Windows \$25
Labeled U-value must be .35 or less

Join with your municipal electric utility to

TAME THE REFRIGERATOR MONSTER

It's time to tame the refrigerator monster!
Here's how:

1 To receive your rebate, fill out the form (see facing page) and mail it to IEEP along with a copy of your village electric bill.

2 You'll receive a phone call to arrange the pick up of your old unit which must be in working order (cold and operational).

3 You'll receive a \$75 rebate, save money on future electric bills, and reduce greenhouse gas emissions!

Why replace and recycle an old refrigerator?

To Save Energy.

Old refrigerators and freezers use three times as much electricity as new energy-efficient models. Refrigeration is one of the largest energy-consumers in residential settings.

To Save Money.

You could save an average of 25% in operating costs each month by replacing your old or inefficient refrigerator with a new ENERGY STAR®-qualified unit.

To Protect the Environment.

When recycling old refrigerators and freezers, 98% of their materials are reused, and harmful refrigerants are removed in an environmentally-safe manner. The alternative is to let it sit in a landfill.

Receive another \$75 rebate by purchasing a new ENERGY STAR®-labeled refrigerator. Complete the form on the back of this brochure to receive your new purchase rebate.

Earning the ENERGY STAR®

ENERGY STAR®-qualified refrigerators require about half as much energy as models manufactured before 1993. They provide energy savings without sacrificing the features you want.

ENERGY STAR®-qualified refrigerator models use high efficiency compressors, improved insulation, and more precise temperature and defrost mechanisms to improve energy efficiency.

ENERGY STAR®-qualified refrigerator models use at least 15% less energy than required by current federal standards, and 40% less energy than the conventional models sold in 2001.

ENERGY STAR®-qualified freezer models use at least 10% less energy than required by current federal standards.

IEEP Refrigerator Pickup Rebate Application

Incentives for residential customers of the following NY municipal electric utilities:

- The Village of Akron*
- The Village of Arcade*
- The Village of Bath*

- The Village of Fairport*
- The Village of Greene*
- The Village of Groton*
- The Village of Hamilton*
- The Village of Lake Placid*
- The Village of Little Valley*
- The Village of Mayville*
- The Village of Penn Yan*
- The City of Plattsburgh*
- The Village of Rouses Point*
- The City of Salamanca*
- The Village of Solvay*
- The Village of Spencerport*
- The Village of Springville*
- The Village of Wellsville*
- The Village of Westfield*

► Why recycle?

It's good for your budget and good for the environment. Over its lifetime, an old refrigerator can produce as much as 10 tons of CO₂, a primary contributor to climate change. Recycling yours would be like keeping the CO₂ emissions from two cars out of the atmosphere.

► What happens to your old unit?

IEEP refrigerator recycling program provides important environmental benefits. Approximately 98% of all materials from your refrigerator and/or freezer are recycled, all harmful chemicals are safely disposed of, and almost nothing goes to a landfill.

► To receive your \$75 rebate

Complete this form and mail it to the address below. Limit of two refrigerator pick-ups per account (\$75 each for a total rebate of \$150). Refrigerator(s) must be cold and operational at time of pick-up.
